**BLU0023599**

**compandor**  
(COMpressor/exPANDOR) A device that improves the quality of a signal by raising the amplitude of weak signals and lowering the amplitude of strong signals. On outgoing transmission, it raises the amplitude of weak signals and lowers the amplitude of strong signals. On incoming transmission, it restores the signal to its original form.

**Compaq**  
(Compaq Computer Corporation, Houston, TX, [www.compaq.com](http://www.compaq.com)) The leading PC manufacturer founded in 1982 by Rod Canion, Bill Murto and Jim Harris. In 1983, it shipped 53,000 PC-compatibles. In 1985, it introduced the COMPAQ Portables, which resulted in \$111 million in revenues and an American business record. In the years, Compaq has been well respected for its high-quality products. In 1997, it acquired Tandem Computers.

**comparator**  
A device that compares two quantities and determines their equality.

**compare**  
A fundamental computer capability. By comparing one set of data with another, the computer can locate, analyze, select, reorder and make decisions. After comparing, the computer can indicate whether the data were equal or which set was numerically greater or less than the other.
